Job Description

Behavioral Innovations is a Dallas, TX based company which provides behaviorally analytic services to children with developmental disabilities (primarily Autism) ranging in age from 2-12. We are in the process of expanding our services to include other areas of Texas and are interested in hiring a well qualified and suited BCBA applicant to serve as Facility Coordinator and oversee our newest facility in San Antonio! A person in this role would be responsible for ensuring treatment efficacy, child safety, proper facility operations, and assist Behavioral Innovations in its efforts to promote both Autism and Behavior Analysis awareness in the community. The Facility Coordinator would oversee all aspects of operations at their facility and would ensure therapist competencies are met, internal policies are followed, state and local regulations are followed, and provide a positive and encouraging work environment for staff and clients. For more information visit our website at www.behavioral-innovations.com.

Job Requirements

Persons interested in this job must:

- possess a Master's Degree in Behavior Analysis or related discipline from a BACB accredited university program
- have obtained certification in behavior analysis (or be eligible to sit for the exam without any additional supervision necessary)
- have a minimum of 2- yrs experience designing, implementing, and monitoring intervention programs for children with Autism
- have a minimum of 2 - yrs experience supervising and managing direct care/therapy/educational staff
- have a minimum of 1 - yrs experience in some kind of fiscal management capacity
- be fluent with Microsoft Office products
- be comfortable giving public presentations and being interviewed
- have worked in a capacity to have transitioned clients between private and public placements
- be willing to work a 40 - hr or more work week with some weekends necessary

Preferred, but not required additional experiences include:

- working understanding of Verbal Behavior
- working understanding of the VB-MAPP and ABLLS-R
- working understanding of Naturalistic Teaching methodology
- working understanding of the Celeration Chart and Fluency based methods of instruction
- working understanding of Positive Behavioral Supports
