

APPLIED BEHAVIORAL ANALYST

Children's Medical Center, a Magnet designated facility, is the primary pediatric teaching facility for the University of Texas Southwestern Medical Center at Dallas. Children's is the only academic hospital in North Texas dedicated exclusively to the comprehensive care of neonates and children from birth to age 18.

The Applied Behavioral Analyst will work with members of the Crystal Charity Ball Autism Program to design and implement Early Intervention ABA services for young children recently diagnosed with Autism and their families. This is a great opportunity to make a difference.

Requirements:

- . Board Certified Behavior Analyst (BCBA) required
- . Master's level degree in a related field preferred
- . Ability to supervise ABA trainees
- . Experience in program development
